

Team#9

MAZAD

Idea:

A platform combines some of companies or merchants who sell their product on auction.

Main Scenario:

User explores some merchants 'products which are sold in some auctions, to join an auction you have to be registered in the platform.

If you managed to bid with **the highest price** during the **auction period**, you will be the winner of the auction and the merchant will get your contact data.

Types of users and their authorities:

User	Actions
Admin	<ol style="list-style-type: none">1. Accept company or merchant request to join platform.2. Delete company or user.3. Display company or user list.4. Display Statistics of platform.5. Delete auction.6. Edit user authorities.

Company or Merchant	<ol style="list-style-type: none"> 1. Make registration request. 2. Create auction and determine (price-period). 3. Get contact data of the winner of Auction. 4. Edit Profile
Normal User	<ol style="list-style-type: none"> 1. Registration and Login. 2. Bid for auction. 3. Make interested auctions list. 4. Display auctions which he succeeded to win. 5. Edit profile
